

About Our Company

How we started

In late 2019, the directors of Techmach Technology Pty Ltd supplier of Food processing equipment, turn key projects and spare parts decided to create a separate company to take care of all the after sale needs.

Our qualified team is dedicate to serve our clients with efficient service and high quality spare parts

Vision

Our vision is to continue improving and revolutionizing the supply of spare parts.

Mission

The mission of our company is to keep on expanding our business and to continue to improve our products.

What we offer

Milling Spares and services offers a wide variety of food processing spare parts, consisting of local manufactured spare parts and imported spares. Not only do we serve the local market we export our spare parts internationally making use of the most competent forwarders, keeping our client's updated weekly ensuring effective communication

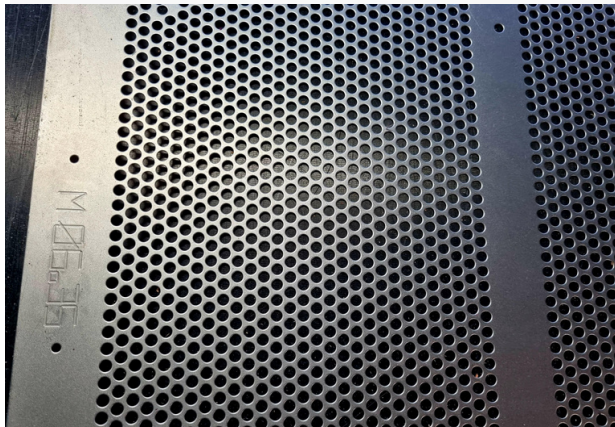

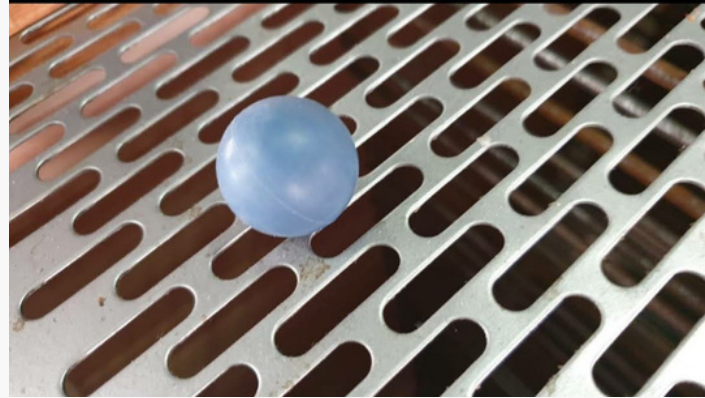

Manufacturing Facility

Milling Spares and services fully equipped manufacturing facility is bases at number 11 Nicholls Street, Chamdor Krugersdorp

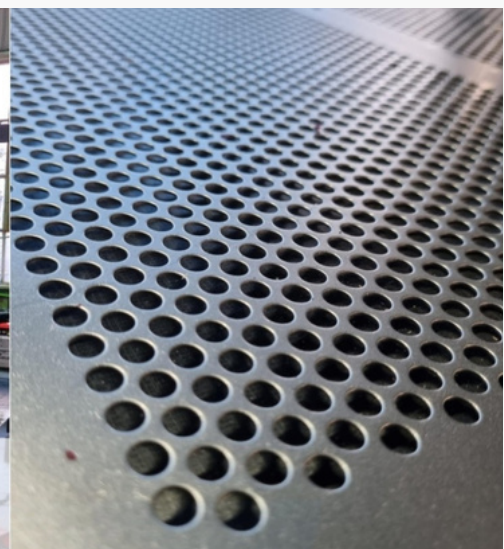

Perforated Plates

With our in house punch machines and designing team, Milling Spares offers custom designed perforated plates to suit our client Specific needs, We work according to our clients specifications and ensure that the correct pitch and flow direction is used to ensure optimal performance

Each Screen is individually designed and programmed to ensure accurate pitch and spacing

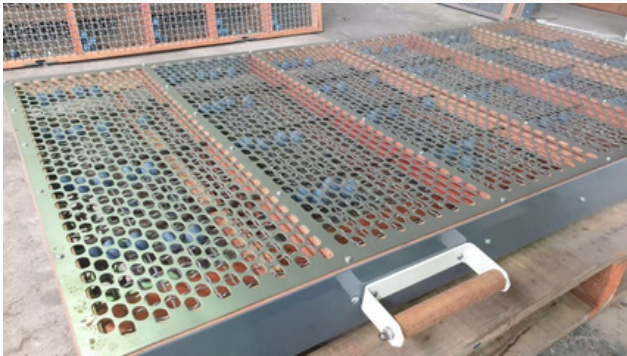

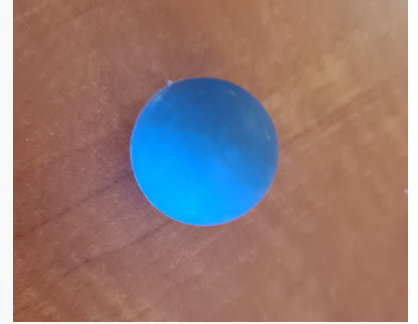

Wood Workshop

With our fully equipped in-house wood workshop, we manufacture custom designed squeezer frames to suit our clients' needs.

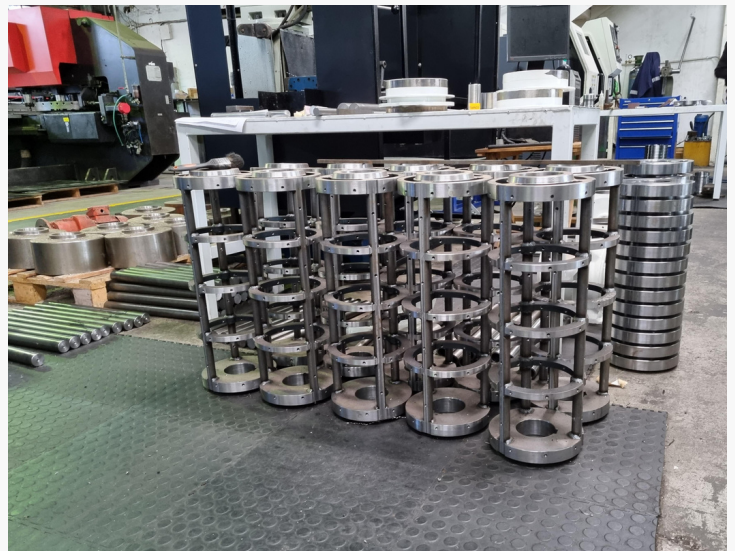

We offer complete frames with wire mesh and rubber balls as a complete solution for easy installation and screen change.

Our team makes use of high quality wood to ensure lasting quality.

Machine Shop

Having our own machine shop on our premises ensure that we are in control of our parts that do require machining and do not rely on a third part that may cause possible delay

Die Refurbishment

With our in house die grinding machines, we offer die refurbishment services, renewing used pelleting dies. Our dedicated team monitor each step of the process ensuring efficient service and quality workman ship. Our die grinding service caters to various size dies per industry demand

Fluting Shop

Our team has invested in a fully automated fluting machine shop. This new investment ensures that we offer our clients only the highest quality workmanship and efficient service on all roll fluting needs, eliminating the additional costs and delay from out sourced suppliers.

Bending Section

Milling Spares and Services has invested in a CNC Hydraulic Press Brake. Fully automated bending machine, that can bend up to 8mm thick steel with a 3m length. This addition , will enable our team to bend in house, increasing our productivity and eliminating delays from out sourced bending

VBF Refurbishments and assembly

Milling Spares and Services transforms used VBF Degerminators from a hard worked machine to a new refurbished unit that will serve our clients as a new unit. Our team has spent years to perfect every part and step of the way. Our team is constantly investigating new designs to improve degermination.

Liners and CNC Section

Milling Spares and Services offers a wide variety of liners and scrapers. With our inhouse drafting team we offer custom designed scrapers and liners offering onsite measuring and design. With a variety of material to chose from, or the option to supply own material.

Bolted Cleaner

Milling Spares and Services transforms used VBF Degerminators from a hard worked machine to a new refurbished unit that will serve our clients as a new unit. Our team has spent years to perfect every part and step of the way. Our team is constantly investigating new designs to improve degermination.
